

Egor Morozov

Frontend Developer

React / TypeScript / Next.js / Node.js

Dubai, UAE · relocation and remote considered

egormorozdev@outlook.com · t.me/egorMrDev

egor-morozov-cv.vercel.app · linkedin.com/in/egor-morozov · github.com/LakerShot

Frontend developer with 7 years of experience shipping production web applications in fintech, betting, adtech and education. I take ownership of the whole delivery path: product requirements, architecture, implementation, CI/CD and monitoring. Strongest in React, TypeScript and Next.js, with production experience in Vue 3 and Angular, and a track record of measurable performance and reliability gains. Worked in distributed English-speaking teams across five countries.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES2023), HTML, CSS / SCSS, BEM
Frameworks	React, Next.js, Vue 3, Angular, RxJS, Node.js
State & data	Redux, Zustand, Pinia, Vuex, REST, GraphQL, PostgreSQL, MongoDB, Redis
UI systems	MUI, Storybook, Strapi CMS, Feature-Sliced Design, design-to-code handoff
Testing	Vitest, Jest, Cypress, Playwright, unit and E2E strategy
Build & infra	Vite, Webpack, Docker, Kubernetes, CI/CD, AWS, S3, Kafka, blue/green deployment, feature toggles
Observability	Grafana, Prometheus, Sentry, ELK stack, Splunk
Engineering	Clean architecture, SOLID, design patterns, CQRS, event sourcing, web performance, SEO
AI-assisted	Claude Code, Codex, agent workflows, RALF cycles, automated review loops

EXPERIENCE

Frontend Developer – Salmon, Consumer fintech

Jun 2023 – Present

Manila, Philippines · hybrid, full-time · React, Next.js, TypeScript, MUI, Strapi

- Built the customer loan application front end from scratch and took it to production.
- Made a major contribution to the Salmon portal redesigns 1.5 and 2.0, including the homepage and product landing pages.
- Shaped a CMS architecture of reusable blocks with stakeholders and several designers, so the team could assemble new product pages without engineering work per page.
- Improved business metrics through performance work, including Redis request caching, holding roughly 99.9% SLA.
- Built an internal debug page that surfaces blocks, analytics events, network requests, GitOps keys and integrations from analytics through to Kafka and Redis.
- Built a scalable MUI-based UI kit, documented it in Storybook and extended Strapi with custom plugins.

Frontend Developer – RMG, Betting platform

Mar 2022 – Jun 2023

Bangkok, Thailand · on-site, full-time · Vue 3, TypeScript, Cypress

- Developed the client platform where users place real-time bets and follow event outcomes live.
- Integrated payment flows across banking providers and crypto, and protected the payment path with unit and E2E tests.
- Raised the Lighthouse performance score from 68 to 93 and built the platform's complex interactive components.

Frontend Developer – Crimtan, B2B adtech

Jun 2021 – Mar 2022

London, United Kingdom · remote, full-time · Angular, TypeScript, RxJS

- Migrated core product functionality from AngularJS to Angular 2+.
- Improved typing of the backend form engine and optimised tree path resolution, confirming a 1.5x performance gain under stress testing alongside higher stability and availability.
- Worked in a fully English-speaking international team across product, documentation and daily communication.

Frontend Developer – Java Mentor, IT education

Jun 2019 – Jun 2021

Batumi, Georgia · remote, full-time · React, TypeScript

- Engineered a learning web application with a focus on usability and performance: bundle size cut by half, time to interactive improved by 20%.
- Designed a modular modal factory on React Portal with independent widgets.
- Supported role-based platform features and migrated legacy JavaScript to TypeScript.

MENTORING

Mentor – Kata Academy

2 years, part-time

St Petersburg, Russia · remote · React

- Led and scaled mentorship for hundreds of students through in-depth code reviews and regular one-to-one sessions.
- Guided learners through the full programme and helped them build individual learning plans.

EDUCATION

Academy of Production Management – Bachelor's degree, Computer Science · Moscow, Russia · distance learning

2024 – 2029

Kotin Academy for Engineering – Secondary education, Engineering Technology · St Petersburg, Russia

2016 – 2020

LANGUAGES

Russian – native · English – professional working proficiency (four years in English-speaking teams)
