

Egor Morozov

FRONTEND DEVELOPER

With **6 years of experience**, I drive technical decision-making and take full ownership of system design and delivery, from translating product requirements into solutions to CI/CD pipelines and production monitoring.

SKILLS

HTML / CSS / Javascript / Git

React / Typescript / NEXT

Vue 3

Angular

Vite / Webpack

CI/CD / Docker / Testing

Storybook, GraphQL, Grafana, Sentry, Cypress, Istio, Prometheus, Strapi, ELK stack, Vitest, Jest, SEO, BEM, S3, Git, ESLint, Prettier, Materialize, REST, NEXT, Vuex, Pinia, Redux, Zustand, RxJS, Node.js, Mui Material, SOLID, GRASP, KISS, DRY, OOP, Design Patterns, Performance, FSD, CQRS, Event Sourcing, Algorithms, Clean Code/Architecture

EDUCATION

Academy of Production Management

September 2024 - June 2029 (Absentia)

Moscow City, Russia, Bachelor's degree, Higher education, information systems and technology

Kotin Academy for engineering

September 2016 - July 2020

St Petersburg City, Russia, Secondary education, Engineering technology / Mechanical engineering

EXPERIENCE

Salmon

REACT NOW FINTEC

Philippines, Manila, Hybrid, Full-time, (2 year, 7 months - present)

Built a loan application from scratch. Migrated a large news from Tilda to a custom solution using Strapi and Next.js. Designed the CMS architecture and reusable content blocks. Improved key business metrics through performance optimizations, including Redis-based request caching (SLA ~99.9%). Built a scalable UI Kit based on MUI components, documented in Storybook and covered with unit and visual regression tests. Extended Strapi core functionality by developing custom plugins (e.g., view-preview-block, reset-web-cache, duplicate-block-content), improving editorial workflows and system maintainability.

Reelmotion Games

VUE BTC

Bangkok, Thailand, On-site, Full-time, (1 year, 3 months)

Combined hands-on development with technical leadership, building complex UI components, ensuring payment system reliability via unit and E2E tests, and improving Lighthouse performance scores by from 68 to 93%.

Crimtan

ANGULAR B2B

London, United Kingdom, Remote, Full-time, (9 months)

Migrated core functionality from AngularJS to Angular (2+). Improved backend form engine typing and optimized tree path resolution, significantly increasing stability and availability, with 1.5x performance improvements confirmed under stress testing.

Java Mentor

REACT EDUCATION

Georgia, Batumi, Full-time, Remote, (2 years)

Engineered a web application for IT education with a strong focus on usability and performance. Cut bundle size by half and improved TTI by 20%. Designed a modular modal factory leveraging React Portal and independent widgets. Supported role-based platform features and migrated legacy JavaScript code to TypeScript.

MENTORING

Kata Academy

react

St Petersburg City, Russia, Part-time, Remote, (2 years)

Led and scaled mentorship for hundreds of students, conducting in-depth code reviews and regular 1-on-1 sessions. Guided learners through their full educational journey, advising on modern web development practices and helping design effective, individualized learning plans.
